## Website Marketing SEO Strategies

We have been offering SEO website marketing services since 1997. We have developed and refined our marketing plans & strategies for over a decade.

The basis for our marketing strategy is to utilize **search engine** optimization (SEO), keyword density, direct navigation, targeted link popularity and a host of other current website marketing techniques.

All of our **marketing strategies** strictly adhere to each search engine's no-Spam & best practices policies while generating highly qualified web site traffic.

We believe a successful website marketing plan is much more than simply optimizing your website to be search engine friendly. The system should also provide support for other strategies such as link popularity, site design and content, the "stickiness" of your site, and ethical marketing practices.

### Website Marketing as it relates to the "MAGIC BULLET" concept.

Many search for, **but never find**, the magic bullet for their marketing strategies. In fact, because search engines change their algorithm - periodically changing their weighted criteria for determining website rankings, the magic bullet simply does not exist because the target continues to move.

That being said, 90%+ of ALL websites could improve their search engine ranking dramatically utilizing our website evaluation service and SEO techniques. Much like a tune up for your vehicle, it may still run but it performs so much better after it has been tuned up and it saves you money in the long run!

Our website evaluation will do the very same for your Internet marketing goals, [click here to learn more.](#)

**BEWARE** not all **SEO website marketing firms** are the same. Each search engine has a "**Best Practices Policy**" they expect websites to follow when implementing their marketing techniques. Not following these practices could actually get your site buried OR eliminated from a search engine all together!!

Chances are you found our website searching one of the following top phrases in the website marketing business on [Google](#):

We have consistently ranked at the very top of search engine results for these very popular phrases since 1997 on most search engines and since the inception of [Google](#).

We will provide the same efforts and implement the same website marketing services that have continually provided the type of rankings outlined above.

**"It is absolutely imperative you select a company by their ability to provide proof their marketing system WORKS."**

Our best way to prove to a prospective client our system works, is simply have them search the phrases above to find us in the search results.

**Why** is it important to gain and maintain a high search engine placement? The chart below indicates how consumers find businesses on the Internet.

"We get compliments on our website's ease of navigation, design and content EVERY DAY"

Penny  
Davis Camper Sales, Inc.

"Thank you so much for all the work, time, effort etc... you've put into this website. I trust your system and abilities completely"

Larry Lafayette  
Lafayette Radio  
Client since 2004

"less than a year ago, we had zero search engine visibility, today you would be hard pressed not to find our website when searching for rvs, rv rentals, motor homes, travel trailers, auto, or trucks for sale Dayton, Ohio"

DD RV and Auto  
Client since May '03

"we have doubled our Halloween sales from last year since starting this website marketing plan"

Gregg Kerns  
Costume Holiday House  
Client since 2001

"we have booked over 95% of all our rooms from your web marketing services ... we have never been so busy in our 10 years of business" "the phone keeps ringing off the hook... each time I put it down another guest is calling to make a reservation!!"

Scott Keils  
Stone Mountain Chalets  
Client since 1998

**Note:** Results may vary based on many factors such as, but not limited to, competition for the phrases, your web site body content, your site URL, and the budget you extend to your marketing goals.

**As** indicated in the research above, people prefer to use search engines almost 2 to 1 over any other source to find products or services on the Internet. The second most common way is guessing a domain name, also known as **direct navigation**. If your industry is in the main stream, the best "**guessing**" domain names (to help your marketing efforts) are probably all taken!
